Full-Stack Developer => [delage.dev](http://delage.dev) <=

## Career Objective

Full-Stack Developer with proven experience at scale up startups, in love with product and agility. Expertise in areas such as maintaining clean code, implementing automated functional and unit tests, DevOps, and co-designing complicated solutions. Proficient in fostering strong relationships with both team members and users, to improve the app's codebase for enhanced reusability. Skilled in gaining knowledge from senior developers while also mentoring junior developers. Demonstrated ability to oversee projects from creation phase to release. Eagle to tackle more challenging tasks and consistently exploring new ways to optimize user productivity.

## Work Experience

### Vocational

2020-Now **Full-Stack Developer**, DeepReach, Paris.

Front: **VueJS 3, ES6 JavaScript**, HTML 5, Sass, Jest, Taiko.

Back: Python 3.8, Docker, NodeJS, PostgreSQL. Github (Actions), Jenkins, AWS.

**Jira, Notions, Heap, Figma, TDD and Agile software development.**
